SERVICE BY INDIVIDUAL METERS

Residential and commercial units served by individual meters are charged based on the size meter installed for the unit according to Table 1. Where a single meter will serve a building containing multiple residential units, the minimum size meter shall be ¾-inch for two and three-unit buildings, and 1-inch for four-unit buildings. Where separate meters will serve each unit of a multi-unit building, separate tap charges from Table 1 will apply for each unit. Del-Co Water reserves the right to determine the meter size to ensure adequate service will be provided.

Table 1 – Individual Meter Tap Charge

Meter Size	Tap Fee	Meter Capacity – GPM		Service Line From Main to Meter – Inches
		Maximum	Continuous	
5/8"	\$5,000.00	20	15	1"
3/4"	\$7,100.00	30	15	1"
1"	\$10,900.00	50	25	1"
1 1/2"	\$23,300.00	100	50	2"
2"	\$37,300.00	160	80	2"
3"	\$79,600.00	650	325	3"

Note: Add a \$10.00 membership fee to all tap fees.

Tap fee includes Del-Co tapping the main line, extending the service to the property, and setting the meter and crock on the property.

FIRE SERVICE CAPACITY SURCHARGE

Non residential buildings provided with separate fire service lines are charged a fire capacity surcharge that is added to the fee in Table 1. The surcharge fee is based on the diameter of the fire service line according to Table 2. An annual maintenance fee is also charged for fire service lines.

Table 2 – Fire Service Capacity Surcharge

Line Size	Surcharge Fee	Annual Fee
1 1/2"	\$1,125.00	\$15.00
2"	\$2,000.00	\$30.00
3"	\$4,500.00	\$66.00
4"	\$8,000.00	\$120.00
6"	\$18,000.00	\$240.00
8"	\$32,000.00	\$360.00
10"	\$50,000.00	\$720.00
12"	\$72,000.00	\$1,080.00
14"	\$98,000.00	\$1,200.00
16"	\$128,000.00	\$1,560.00

SERVICE IN MASTER METER AREAS

The tap fee for areas served by a master meter shall be the summation of the capacity charge, the meter charge, and the fire service capacity surcharge as determined from Table 3. The minimum capacity charge for single commercial building shall be \$5,000.00. Demand estimates shall be provided by a licensed professional engineer to Del-Co Water upon request.

Table 3 – Master Meter Tap Charge

Capacity Charge	Residential Communities	Number Bedrooms per Unit	Fee per Unit
		1	\$2,650.00
		2	\$3,150.00
		3	\$3,700.00
	4 or Single Family Unit	\$4,200.00	
	Commercial Units and Multi-use Buildings	Capacity charge is based on the estimated water demand for each building. Basis of estimating demand shall be AWWA M22, <i>Sizing Water Service Lines and Meters</i> . Engineer shall submit plumbing drawings and a schedule of fixtures for each building to Del-Co Water. Del-Co Water will determine the required meter size and corresponding fee from Table 1 for each building.	
Meter Charge	Meter Size	Capacity – GPM	Fee
	6" X 1 ½"	2,000	\$9,000.00
	8" X 2"	3,500	\$12,000.00
	10" X 2"	5,500	\$16,000.00
Fire Service Capacity Surcharge	Meter Size	Fee	
	6" X 3"	\$18,000.00	
	8" X 4"	\$32,000.00	
	10" X 6"	\$50,000.00	

Del-Co reserves the right to require a development to be served with a master meter whenever there may be accessibility or maintenance problems in servicing the water facilities. When a master meter is used, the developer may also be required to construct a public water line around the development for service to adjacent properties.

The developer is responsible for the master meter vault per Del-Co Water standards.

GENERAL

Developers shall be responsible for the construction of all public water facilities in the development including crossing roads to connect onto existing waterlines.

Buildings on separate parcels shall be served by dedicated meters. Service areas beyond the meter shall not cross property lines.
